PROFESSIONAL EXPERIENCE

Henry Bootcamp, Buenos Aires

Sep 2024 – Mar 2025

Full Stack Developer

- Managed a team of 8 in the development of an ecommerce platform, providing users with access to 1000+ products, customize orders, detailed product information and secure purchasing capabilities.
- Architected the system design through entity-relationship models to structure the database, this initiative boosted data management efficiency, resulting in a 30% boost in query performance metrics.
- Engineered and deployed a robust suite of CRUD operations for managing stock, product, user, and order data; streamlined processes to a 40% reduction in data retrieval time and improved overall system efficiency.
- Built an administrative dashboard that visualizes key performance indicators, including top-selling products and user purchase trends, which enhanced data-driven decision-making.
- Designed and enforced security protocols to restrict access to administrator routes, safeguarding sensitive data and essential system functionalities from unauthorized users.
- Implemented front-end enhancements that led to a 20% decrease in loading times by employing lazy-loading strategies, optimizing server call efficiency, and compressing images, resulting in a better user experience.
